

'PROTEK' ENGINE PROTECTION

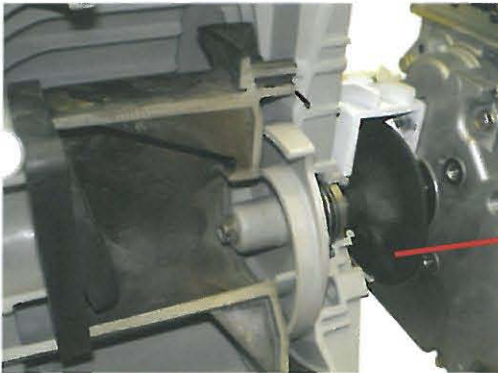

MAXIMUM ENGINE PROTECTION

IDEAL FOR FERTILIZER TRANSFER

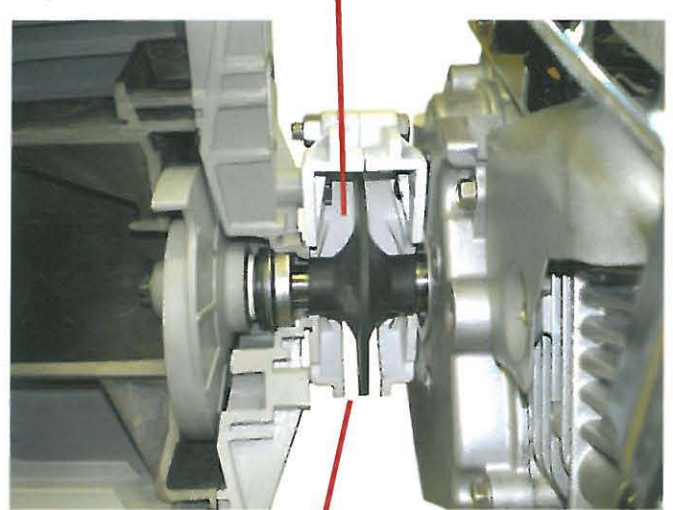

PROTEK SYSTEM

Series 'S' assembled with a protek

Oversized slinger to prevent any liquid passing through system.

Large cavity to protect engine against any possible seal failure.

Oversized weep hole directs liquid down, and away from operator.

**PACER PUMPS IS THE
ORIGINATOR OF THIS
UNIQUE DESIGN**

Our unique protek system is designed to physically separate the pump from the engine. This provides you with **maximum** engine protection, even against catastrophic seal failure. Available as a prebuilt option from the factory or as a retrofit kit to upgrade your current model. Consult factory for details. Refer to part number P-58-0015.
